### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

While the reference of McCann suggests sealing the vessel of Cotton to deplete the vessel of oxygen during the switch between a preliminary aerobic pre-conditioning and anaerobic digestion of the vessel contents, the instant claims differ by requiring that the vessel is sealed and the oxygen content of the vessel is depleted prior to adjusting the water content and/or inoculating the vessel contents with an anaerobic bacterial inculum (See pages 6-7 of Applicant's remarks dated 6/28/2006 and rule 37 CFR 1.132 declaration filed 6/28/2006). No prior art of record suggests this specific order of steps when switching between a preliminary aerobic pre-conditioning and anaerobic digestion within a single digestion vessel.

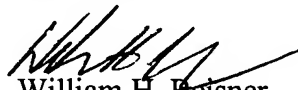

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
